

PRESS RELEASE

26th March 2014

EUROSCIENCE supports the Science and You project

Euroscience is pleased to announce that it supports the Science and You project. Science and You is an international conference that will take place in the Lorraine Region in France in June 2015. It will bring together all those interested in science communication: researchers, PhD students, science communicators, journalists, professionals from associations and museums, business leaders, politicians, and just curious...

Raymond Seltz, Deputy Secretary General of Euroscience said:

“We are pleased to be able to support such an innovative project. The Université de Lorraine is a pioneer in Science Communication in France and in Europe.”

Chaired by high-level scientific committee including Professor Joëlle Le Marec, University of Paris 7 (France), Bernard Schiele (Canada) or Hester du Plessis (South Africa) this outstanding new event will include a Science Programme as well as a Forum including stands, exhibitions, workshops, live performances, the final round of the *My thesis in 180 seconds* competition, science and technology cafes... accessible to the general public. The most innovative forms of communication will be presented by research institutions and actors of science communication and business in order to advance the debate on science and reflect on the scientific and technological culture of tomorrow. The Science and You project will also provide trainings for future researchers to make them aware of the importance of the relationship between science and society. The public is at the heart of this event and will be able to make the most of a cultural and scientific programme specially organized for the occasion in Nancy, Metz and other towns in the region.

Conferences, debates, a science and technology village, screening of films from the Researchers' Film Festival, activities and fun workshops on science, science theatre performances...

Notes for Editors

EuroScience (ES) is a European non-profit grassroots association open to research professionals, teachers, students, science administrators, policy-makers, etc. and generally to any citizen interested in science and technology and its links with society. EuroScience represents not only European scientists of all ages, disciplines and nationalities but also from the business sector and public institutions such as universities and research institutes.
